1. INTRODUCTION

1.1 Purpose of the Document

This document describes the Agreement Creation functionality for the Agreement Tracking System implemented in Django (backend) and React (frontend). This document describes the functionality proposed in the Agreement Management System as part of the implementation solution for the Agreement Creation Process.

The intended audiences for this document are:

- a. Users
- b. Testers
- c. Technical Architects & Developers

1.2 References

Document Name	Description
API_ENDPOINTS_GUIDE.md	API specifications for React integration

1.3 Terminology

1.3.1 Field Rule Properties

This section lists down field type and field rule description

Code	Description
R	Required
O	Optional
C	Conditional
CR	Conditionally Required

CE	Conditionally Enabled
CD	Conditionally Disabled
OOR	One of Fields Required
NA	Not applicable

1.3.2 Field Type

Code	Description
DD	Single select drop down list of values
F	Free format input (typically in a text box / text area)
DP	Provides an icon next to field for selecting date from the month wise calendar displayed
RO	Read Only

1.3.3 Data Element

Data Type	Description	Allowed Characters			
NUM/N (XX)	Number	0 to 9			
AN	Alphanumeric	a to z	A to Z	0 to 9	
A	Alphabet	a to z	A to Z		
DAT	Date (DD/MM/YYYY)	0 to 9	-	/	

1.3.4 Acronyms & Abbreviations

S N	Term	Explanation
1	API	Application Programming Interface
2	JWT	JSON Web Token
3	CORS	Cross-Origin Resource Sharing

4	POST	Power On Self Test
5	CSRF	Cross Site Request Forgery
6	REST	Representational State Transfer
7	ORM	Object Relational Mapping
8	DD	Drop Down
9	DP	Date Picker
10	RO	Read Only

2. PROJECT OVERVIEW

Key Functionalities of The Agreement Tracking System are:

- 1) Agreement Creation
- 2) Agreement Editing
- 3) Agreement Preview
- 4) Agreement List View
- 5) Reminder Management
- 6) User Access Control
- 7) Department-based Permissions

3. PREREQUISITES

Key elements and prerequisites for the Agreement Creation process:

- a. Only authenticated users with proper department permissions can create agreements
- b. Executive users can view all agreements but cannot create/edit
- c. Users must have 'edit' permission for particular department to edit agreements

4. BUSINSESS REQUIREMENT- AGREEMENT CREATION

Users will be able to create and manage agreements through the following methods:

4.1 Agreement Creation

4.1.1 User Journey

1. Overview

Users with proper permissions can create new agreements through a multi-step process including form filling, preview, and submission.

2. Agreement Creation Process

2.1 User Journey

a. Access Methods:

Web: Through agreement creation form

b. Inputting Data:

- Users fill in agreement details including title, reference, department, vendor, relevant dates
- Upload supporting attachment files

c. Validation:

- Client-side validation for required fields
- Server-side validation for business rules

d. Preview:

- Users can preview agreement before submission
- Make final adjustments if needed

e. Submission:

- Final submission creates the agreement
- Assigned users automatically get access

f. Error Handling:

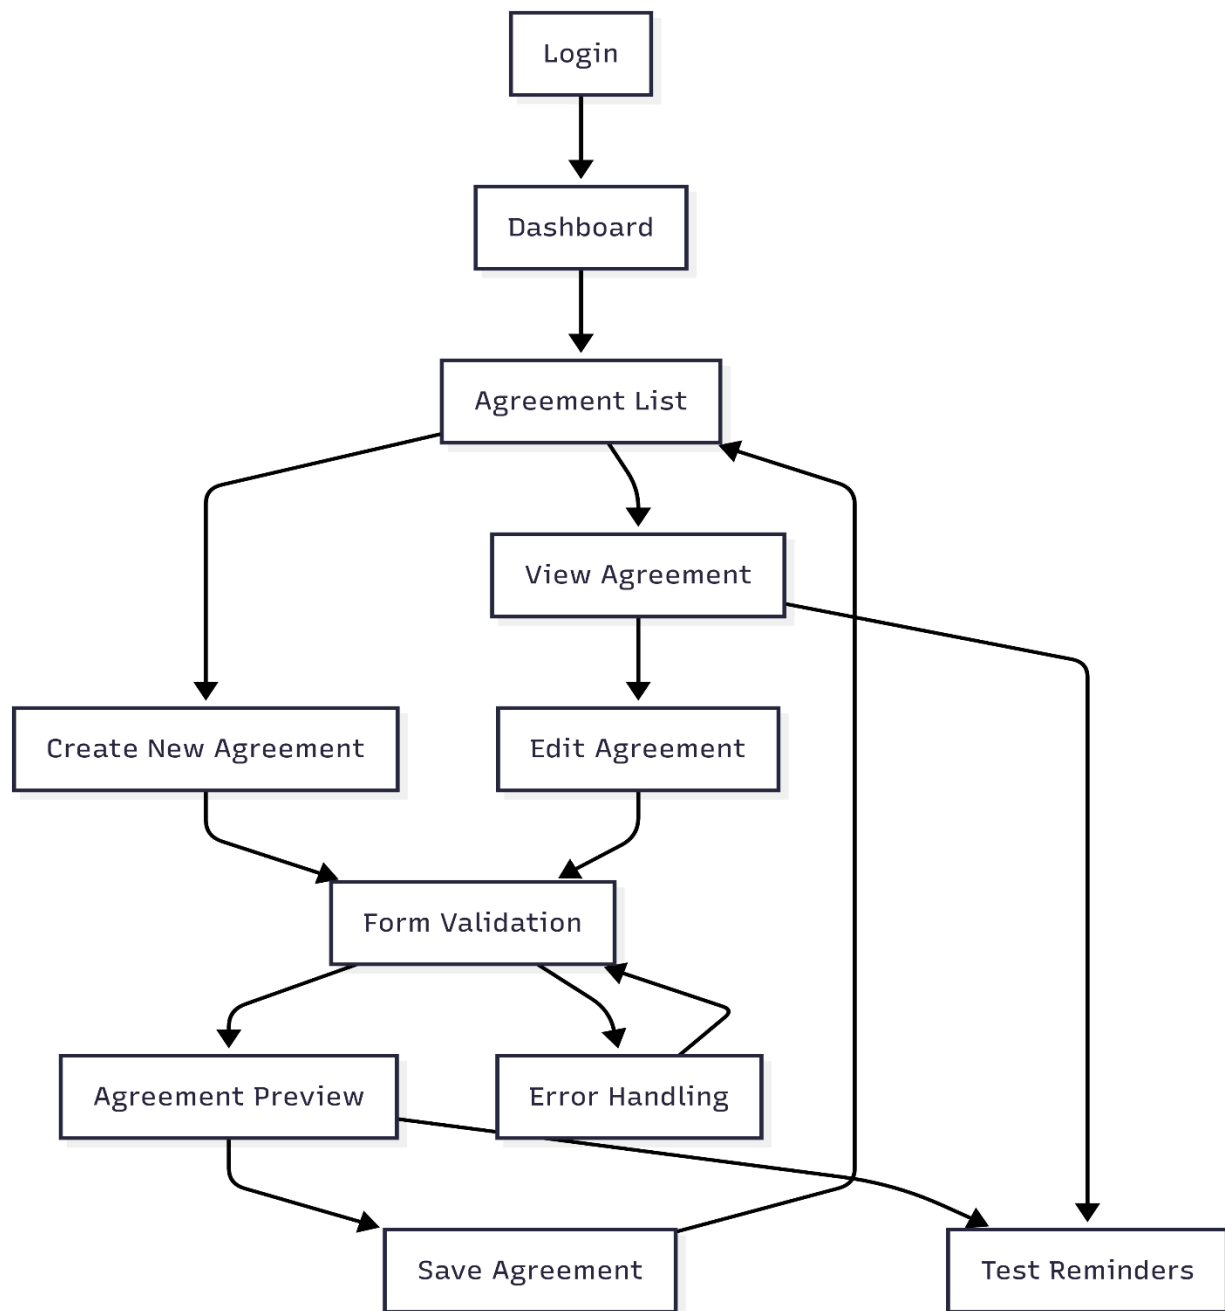

- Clear error messages for validation failures
- CSRF protection for form submissions

Note:

Web: Refers to accessing Agreement Tracking through a web browser.

This documentation outlines the steps involved in the Agreement Creation process for Agreement Tracking.

4.1.2 Agreement Creation User Flow
