1. INTRODUCTION

1.1 Purpose of the Document

This document describes the sign-in functionality for the Agreement Tracking System implemented in Django (backend) and React (frontend). It covers authentication workflows, API endpoints, and UI specifications. The intended audiences for this document are:

The intended audiences for this document are:

- a. Users
- b. Testers
- c. Technical Architects & Developers

1.2 References

Document Name	Description
API_ENDPOINTS_GUIDE.md	API specifications for React integration

1.3 Terminology

1.3.1 Field Rule Properties

This section lists down field type and field rule description

Code	Description
R	Required
O	Optional
C	Conditional
NA	Not applicable

1.3.2 Field Type

Code	Description
CB	Checkbox
F	Free format input (typically in a text box / text area)
P	Password

1.3.3 Data Element

Data Type	Description	Allowed Characters			
NUM/N (XX)	Number	0 to 9			
AN	Alphanumeric	a to z	A to Z	0 to 9	
A	Alphabet	a to z	A to Z		
DAT	Date (DD/MM/YYYY)	0 to 9	-	/	

1.3.4 Acronyms & Abbreviations

S N	Term	Explanation
1	API	Application Programming Interface
2	JWT	JSON Web Token
3	CORS	Cross-Origin Resource Sharing
4	POST	Power On Self Test
5	CSRF	Cross Site Request Forgery

2. PROJECT OVERVIEW

The Agreement Tracking System requires secure user authentication with the following features:

- 1) Email/password-based sign-in
- 2) Session management
- 3) CSRF protection
- 4) Role-based access control

3. PREREQUISITES

Key elements and prerequisites for Login process:

- a. Users must be registered in the system.
- b. Valid email and password are required.
- c. CSRF tokens must be handled for POST requests.

4. BUSINESS REQUIREMENT- SIGN IN

Users will be able to log in for Agreement Tracking by using following methods:

4.1 Sign In

4.1.1 User Journey

1. Overview

Users will be able to access the Agreement Tracking through the sign-in process, which includes authentication and session management.

2. Sign In Process

2.1 User Journey

a. Login Methods:

Customers can log in using the following method:

Web: Email and password.

b. Authentication:

Backend validates credentials via POST /api/accounts/login/.

c. Session Management:

Single session per user.

d. Session Expiry:

Session expires after 30 minutes of inactivity.

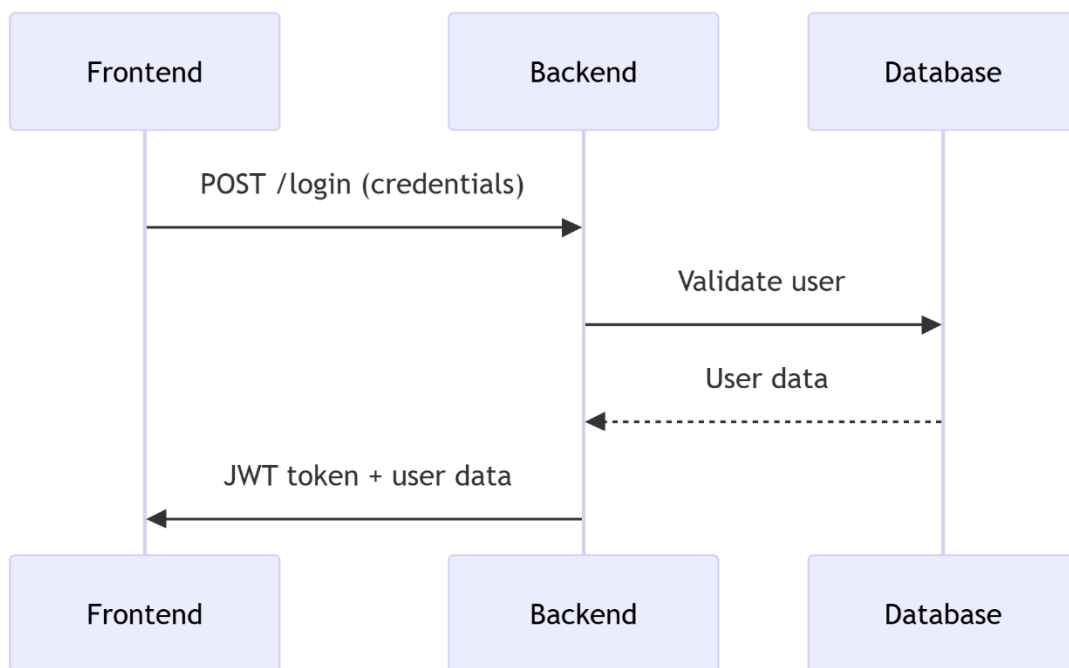

e. Error Handling - Incorrect Credentials:

If a user enters incorrect credentials:

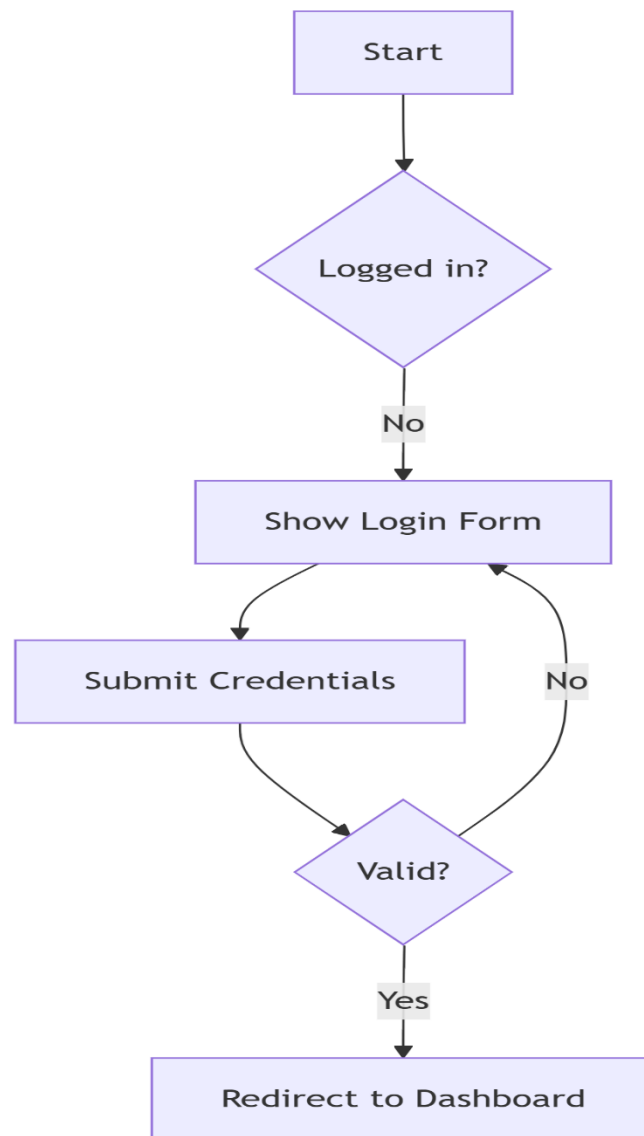

The system will not allow access.

An error message will be displayed: Invalid credentials: 401 Unauthorized with error message

4.1.2 Authentication Flow

4.1.3 User Flow

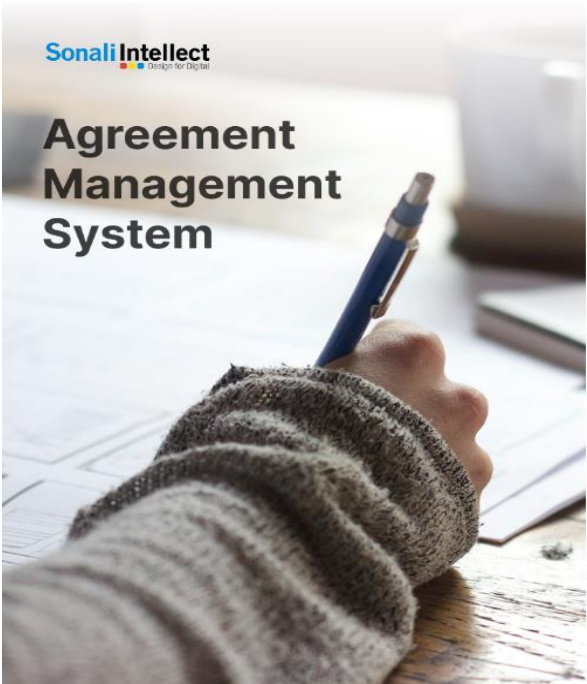

Note:

Web: Refers to accessing Agreement Tracking through a web browser.

This documentation outlines the steps involved in the sign-in process for Agreement Tracking, ensuring secure access and session management for customers.

5. USER INTERFACES

For Web:

SIGN IN

Your Email ID *
